

# Wireless Technology Trends: Big Steps and Challenges

Seminar 1

December 2016

## Cloud Computing to Fog Computing: **The Next Big Thing**

The Internet of Things (IoT) is generating an unprecedented volume and variety of data. But by the time the data makes its way to the cloud for analysis, the opportunity to act on it might be gone. In this seminar, a new model for analyzing and acting on IoT data. It is called Fog computing.

By Dr. Tara Yahiya
